Amal Elleuch is an Associate Professor at the University of Sfax, Tunisia. She obtained her PhD from the National Engineering School of Monastir, Tunisia in 2013, and her HdR in Energy Engineering from The National Engineering School of Monastir, Tunisia in 2018. Dr. Elleuch is a Professor of Energy Engineering at IPEIS, University of Sfax, Tunisia. Since 2011 she has taught courses on thermodynamics, fluid mechanics, fuel cells and renewable energies, pyrolysis, combustion and gasification and fuel processing engineering. Dr. Amal Elleuch research activities focus on the thermochemical and electrochemical conversion processes of biomass and wastes (Pyrolysis, gasification, DCFC and SOFC fuel cells). Dr. Elleuch has over 14 articles in peer-reviewed international journals and over 30 papers in international conferences. Dr. Elleuch was a Visiting professor at Tianjin University of China in 2014 and 2018 and at Aalto university in 2017.
